

Alesta[®] AM: Antimicrobial-treated Powder Coatings

Protection for a cleaner surface technology

Concerns abound, more than ever before, over the cleanliness of the many surfaces that we come in contact with daily.

That is why DuPont[™] CoatingSolutions brings you an advanced powder coating, with antimicrobial technology, designed to fight destructive microbes on nearly any surface. Made with the natural protection of silver, Alesta[®] AM powders protect surfaces from microbes, even with light scratches and abrasions. Alesta[®] AM powder coatings provide patented*, effective technology to reduce and inhibit of bacteria on your powder coated surfaces by utilizing an antimicrobial agent.

Alesta[®] AM powders are ideal for areas where clean is critical:

- Hospital environments
- Medical/healthcare equipment
- Schools and classrooms
- Water treatment plants
- Food service & packaging areas
- Childcare facilities
- Office products and work areas

This technology can be incorporated in most Alesta[®] AM powder coatings. Call your DuPont representative to see how we can customize a product for you.

Please contact our Customer Service Team at 1-800-247-3886 for a complete list of Alesta[®] AM products available.
